

Please Note

- If you've purchased the device from a carrier, it may require SIM unlock.
- eSIM cannot be downloaded outside of Wi-Fi environments.
- eSIM can only be installed once.
- After pressing the 'Issue eSIM' button from the URL provided in the email, installation (download) is required within **48 hours**.
- If you make a mistake in the setup and delete the eSIM, it cannot be reissued or canceled. Please note that even if the 48-hour installation deadline expires, it cannot be reissued.
- The start date will be the date of download.
- If you use up the capacity within the usage period, speed restrictions will apply. There is no way to undo this, so if necessary, please apply for a new eSIM.
- You won't be able to communicate after 24:00 on the end date.
- Please note that the explanations for the Android and iPhone versions below may vary depending on the version and model of your smartphone.

STEP1 : Generation of Activation Code

① Email Reception

After completing your application, you will receive an email with a URL for generating the activation code immediately. Open the URL provided in the email. *If you choose to pay at a convenience store, you will receive the email after payment confirmation.

② After confirming your application plan on the displayed page, select 'Get QR Code (QRコードの取得)'.

Data only eSIM : RS-52263667

Booking information :

Booking code	RS-52263667
Creation date	2024-02-08 17:09

eSIM :

Plan	Data only eSIM 10 GB / 8 days
Qty	1

#1 : Get QR-Code

③ After reviewing all the contents of the precautions, check all the items. Select 'I confirm and issue eSIM'.

Data only eSIM : RS-52263667

STEP2 : Download eSIM iPhone

※The displayed content may vary depending on the device model and version.
eSIM can only be installed once. Please note that eSIM cannot be downloaded outside of Wi-Fi environments.

①Open [Settings], select [Cellular].

②Select[Add eSIM]

③Select[Use QR Code]

④Select[Enter Details Manually]

⑤The activation code input screen will be displayed.

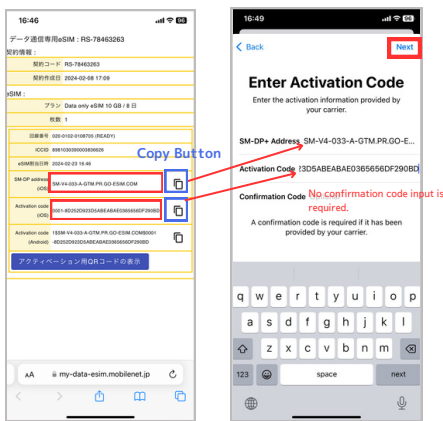

⑥safariを開く

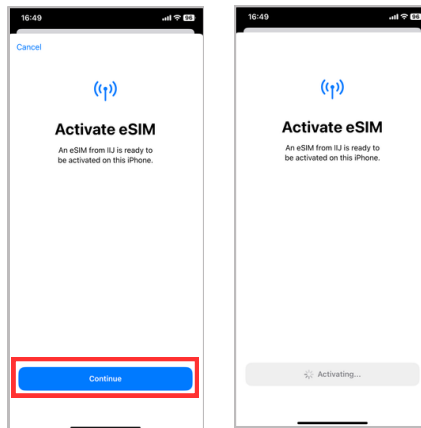

⑦Copy and paste 'SM-DP+ Address(iOS)' and 'Activation code (iOS)', then select '[Next].'

*Please make sure to use the iOS code.

⑧When prompted with 'Activate eSIM An eSIM from IUJ is ready to be activated on this iPhone', select [Continue]. The activation will begin.

⑨The activation is complete. Select [Done].

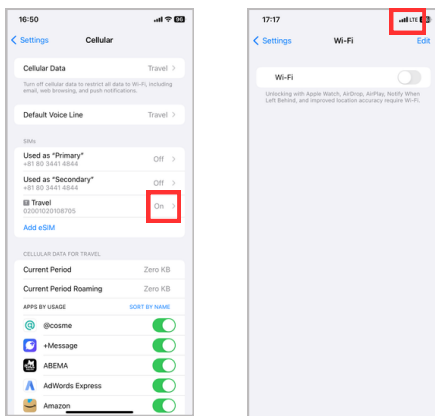

⑩Check that the line number is displayed on the SIMs and it is set to 'On'.

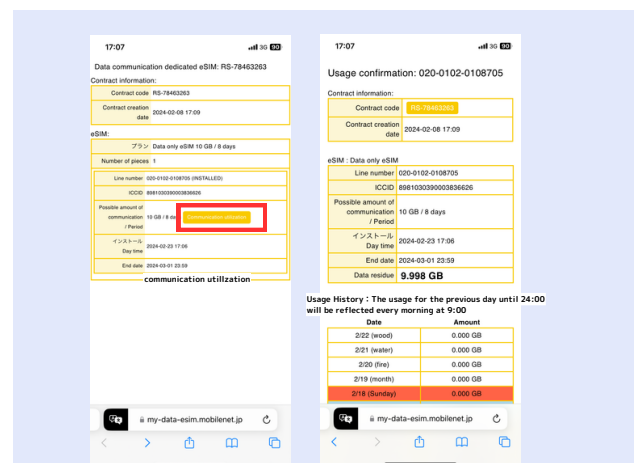

⑪Confirm that the added eSIM name is displayed in the Mobile Data section and that the other lines are turned off.

On iPhone, the added eSIM name is randomly assigned. Turn off Wi-Fi, and if 'LTE' is displayed, the setup is complete. Initially, '3G' may be displayed after setup. It may take some time for it to change to 'LTE', so please be patient. You can also try restarting your device. *Even after restarting, '3G' may continue to be displayed for a while.

If you are unable to connect and have already set up another eSIM, APN settings are required. Please proceed to STEP 3 for APN settings.

After completing the setup, open the browser (Google) and refresh the page to display the My Page. Select 'communication utilization' to check the end date and remaining data amount.

If you accidentally close the page, you can reopen the My Page by accessing the URL provided during the application process.

STEP3 : APN Settings iPhone

※The displayed content may vary depending on the device model and version.

eSIM can only be installed once. Please note that eSIM cannot be downloaded outside of Wi-Fi environments.

①Open [Settings], select [Cellular].

②Select the added eSIM.

③Select [Cellular Date Net]

④Enter the following in both locations (Cellular Date/Personal Hotspot)
 APN: vmobile.jp Name: rakusim
 Leave the other fields blank.
 If prompted for a password, enter [rakusim]

⑤Press '<' to go back to the previous screen.

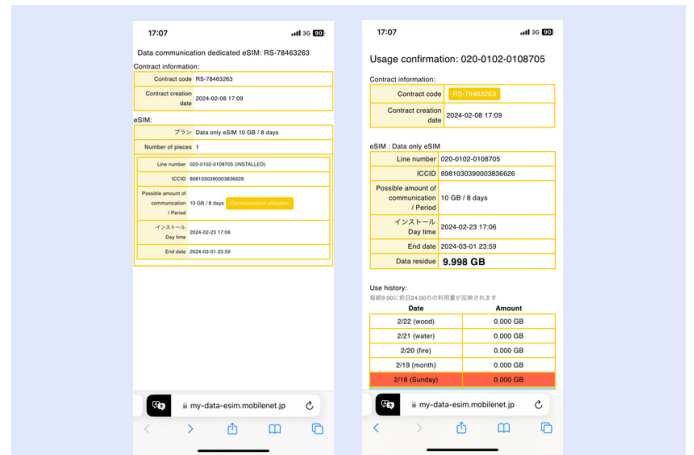

⑥Confirm that the added eSIM name is displayed in the Mobile Data section and that the other lines are turned off.

On iPhone, the added eSIM name is randomly assigned. Turn off Wi-Fi, and if 'LTE' is displayed, the setup is complete. Initially, '3G' may be displayed after setup. It may take some time for it to change to 'LTE', so please be patient.

You can also try restarting your device.

*Even after restarting, '3G' may continue to be displayed for a while.

After completing the setup, open the browser (Google) and refresh the page to display the My Page.

Select 'communication utilization' to check the end date and remaining data amount.

If you accidentally close the page, you can reopen the My Page by accessing the URL provided during the application process.

APN Information

If you are asked to enter your username and password in step ④, please enter the following.

APN	vmobile.jp
Username	rakusim
password	rakusim
